About the Major Projects Inventory

The BC Major Projects Inventory contains summary information on major projects in the Province of British Columbia, Canada, that are over $15 million (Cdn.) capital cost, or $20 million in the Lower Mainland–Vancouver area.

Sources of MPI Information
Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits.

Project Location
Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g. a municipality.

Updates
New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs
Cost estimates are general estimates from the information sources used.

Start and Finish Dates
Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status
Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted as cancelled, then removed from the next issue of the MPI.

Highlights of the December 2001 Issue

Of the 13 new proposed major projects in the fourth quarter of 2001, the largest is the UBC Life Sciences Centre at $135 million, in the early planning stages.

Two major residential projects started construction, and 14 projects met their last quarter completion dates. A number of smaller water and sewer projects have been announced under the Canada-B.C. Infrastructure Program totalling $37 million, however, none of the 15 individual projects are over the MPI $15 million threshold and therefore will not be tracked in the MPI. The projects include a water reservoir for 108 Mile House; water- treatment plant for Telkwa; chlorination plant in Campbell River; water filtration plants in Slocan, Port Edward, Abbotsford-Mission and the Sunshine Coast; water-system upgrades for Naramata, Enderby, Walhachin and Nakusp; water and sewer system for Kye Bay; and secondary sewage-treatment facilities in Lillooet and Lytton. The municipalities should be contacted if readers would like further information on these projects.

Subscribers: please call us at (250) 385-6101 if further information is needed or if you have suggestions for future issues.

Cassiar

Magnesium Metal Project, Cassiar Mines & Metals Inc.
Ph: (416) 204-1455
Proposed development of a magnesium metal development project to recover up to 200 million pounds of magnesium a year from tailings at the former Cassiar asbestos mine, for use in the auto, aircraft and canning industries. Aluminum of Korea Ltd. is a major investor in the project, to secure a supply of magnesium. A magnesium processing plant would be located in one of the communities in the region. Expected 2500 construction jobs and 600 operating jobs. Finish date is start of full commercial production. The company is currently actively mining asbestos from tailings but magnesium production remains at pre-feasibility stage due to lack of power grid. Project currently on hold due to a fire at mill. The mill will be rebuilt before this project will proceed. No dates as to when rebuilding of the mill will begin.
